

InitialWeights

```
graph BT; Automatize --> InitialWeights; Constant --> InitialWeights; Randomize --> InitialWeights;
```

The diagram illustrates three different methods for initializing weights, all of which converge to a single 'InitialWeights' box at the top. The methods are 'Automatize', 'Constant', and 'Randomize', each in its own box at the bottom. A horizontal line connects the three bottom boxes, and a vertical arrow points from the center of this line up to the 'InitialWeights' box.

Automatize

Constant

Randomize
